SUMMARY DISCLOSURE STATEMENT for ACCELERATED DEATH BENEFIT

Benefit:
Subject to the terms of this Benefit, we will pay a portion of the death benefit upon receiving proof that the insured is terminally ill. An accelerated death benefit can only be paid one time.

Consequences of Receiving Accelerated Death Benefit:
The receipt of an accelerated death benefit may be considered a taxable event under the Internal Revenue Code. The receipt of an accelerated death benefit may also affect eligibility to receive, or continue to receive Medicaid benefits, or other state or federal government benefits and entitlements. Before you elect to receive any accelerated benefits, you should consult with your tax advisor.

Amount You May Elect:
You may elect the amount of the accelerated death benefit to be paid. The limits are outlined in the Benefit but are generally limited to the lesser of 60% of the death benefit of the policy or $1,000,000. We will charge an administrative fee of not more than $300, deducted from any payment made.

When Eligible for Payment of Benefit:
You are entitled to receive the accelerated death benefit when we have determined that the insured is terminally ill and has a life expectancy of 6 months or less.

Notice and Proof of Qualifying Event:
We will require proof that the insured is terminally ill. The diagnosis must be made by a physician as defined in the Benefit. Any diagnosis must be the result of clinical, radiological, histological, or laboratory evidence of the terminal illness. We may require a second medical opinion by a physician of our choice at our expense. If there is a conflict of opinion, we reserve the right to make the final determination.

Effect of an Accelerated Death Benefit:
When you elect to receive an accelerated death benefit, it will be treated as a lien against your policy. We will charge you interest on the accelerated death benefit paid to you. The Accelerated Death Benefit does not have an effect on the Premium and/or Cost of Insurance Charges of the base policy.

The maximum interest rate we may charge you is the greater of:

1. The interest rate charged on policy loans; or
2. the current 90 day U.S. Treasury Bill rate in effect on the date that the accelerated death benefit is paid.

The maximum interest rate we will charge on the portion of the lien which is equal to the cash surrender value of the policy at the time the accelerated death benefit is requested will be no greater than the rate we charge on policy loans.

The accelerated death benefit will first be used to repay any outstanding policy loans and any unpaid accrued interest thereon. Your access to the cash surrender value of your policy, if any, will be limited to the excess of the cash surrender value over the lien. The death benefit will also be reduced by the amount of the lien. There will be no effect on any benefits not used to determine the accelerated death benefit.

Any irrevocable beneficiaries or assignees must send us a written consent to the accelerated death benefit payment. The written request must be in a form satisfactory to us.

Below is a **sample illustration** of the effect of an accelerated death benefit on a **UNIVERSAL LIFE** policy. This illustration shows the effect on the face amount of the policy before the accelerated death benefit is elected, immediately after the election is made and 12 months after the election is made (assuming the insured is still living). This illustration also assumes:

(1) the Face Amount is $100,000; (2) a 50% accelerated death benefit is elected; (3) we are charging 6% on the lien; and (4) for **UNIVERSAL LIFE**, the cash surrender value does not change after the accelerated death benefit is elected.

NOTICE AND CONSENT FOR AIDS VIRUS (HIV) TESTING

Acquired Immunodeficiency Syndrome (AIDS) is a life-threatening disorder of the immune system, caused by a virus, HIV. The virus is transmitted by sexual contact with an infected person, from an infected mother to her newborn infant, or by exposure to infected blood (as in needle sharing during IV drug use). Persons at high risk of contracting AIDS include males who have had sexual contact with another man, intravenous drug users, hemophiliacs, and sexual contacts with any of these persons. AIDS does not typically develop until a person has been infected with HIV for several years. A person may remain free of symptoms for years after becoming infected. Infected persons have a 25 percent to 50 percent chance of developing AIDS over the next 20 years. Symptoms which may develop include fever (including night sweats), weight loss, swollen lymph glands, fatigue, diarrhea and white spots or unusual blemishes in the mouth.

1. **PURPOSE OF THE HIV TEST.** To evaluate your insurability, the Insurer named above, Protective Life Insurance Company, has requested that you provide a sample of your blood, urine or other body fluids for testing and analysis to determine the presence of human immunodeficiency virus (HIV) antibodies or antigens. This is not a test for AIDS; AIDS can only be diagnosed by medical evaluation.
2. **PRE-TEST COUNSELING.** Many public health organizations have recommended that before taking an AIDS-related test, a person seek counseling to become informed concerning the implications of such a test.
3. **METHOD AND ACCURACY OF THE HIV TEST.** The HIV antibody test that is to be performed is actually a series of tests done by a medically accepted procedure. Your blood, urine or other body fluids sample will first be subjected to a test known as ELISA (enzyme-linked immunosorbent assay). If the result of this test is positive, the ELISA test will be repeated. If this repeat ELISA test is also positive your blood, urine or other body fluids specimen will then be subjected to another, more specific technique called the Western blot test, for confirmation. Your test result is considered positive only after positive results are obtained on two ELISA tests and a Western Blot test. The HIV antibody test is extremely accurate. However, in rare instances the test may be positive in persons who are not infected with the virus (a false positive). This may include persons who have not engaged in high risk behavior. These individuals are encouraged to seek retesting to help confirm the validity of the positive test. Additionally, the test may occasionally be negative in persons who are infected with HIV (a false negative) especially when the infection occurred recently; it takes at least 4-12 weeks for a positive test result to develop after a person is infected.
4. **CONFIDENTIALITY OF HIV TEST RESULTS.** All test results will be treated confidentially. They will be reported by the laboratory to the Insurer. When necessary for business reasons in connection with insurance you have or have applied for with the Insurer, the Insurer may disclose test results to others such as its affiliates, reinsurers, employees, or contractors. If the Insurer is a member of the MIB, LLC. and if the test results for HIV antibodies/antigens are other than normal, the Insurer will report to the MIB, LLC a generic code which signifies only a non-specific laboratory test abnormality. If your HIV test is normal, no report will be made about it to the MIB, LLC. Other test results may be reported to the MIB, LLC in a more specific manner. The organizations described in this paragraph may maintain the test results in a file or data bank. There will be no other disclosure of test results or even that the tests have been done except as may be required or permitted by law or as authorized by you.
5. **POSITIVE TEST RESULTS.** Positive HIV antibody/antigen test results do not mean that you have AIDS, but that you are at significantly increased risk of developing AIDS or AIDS-related conditions. Federal authorities say that persons who are HIV antibody/antigen positive should be considered infected with the AIDS virus and capable of infecting others.
   Positive HIV antibody or antigen test results or other significant laboratory test abnormalities will adversely affect your application for insurance. This means that your application may be declined, that an increased premium may be charged, or that other policy changes may be necessary.
6. **NOTIFICATION OF HIV TEST RESULTS.** If the test results are negative, no routine notification will be sent to you. Positive or indeterminate test results will be provided to the private physician you indicate below:

   _____ _____
   Physician's Name Physician's Address

   In absence of a designated physician, positive or indeterminate test results will be communicated in accordance with the rules of your state. Some states will require notification of positive or indeterminate test results to the local health department in addition to or in lieu of notification to your private physician.

CONSENT: I have read and I understand this Notice and Consent for HIV (AIDS)-Related Testing and the accompanying informational pamphlet entitled *HIV & AIDS: Get The Facts*. I voluntarily consent to testing and disclosure as described above. I understand that I have the right to withdraw this consent prior to being tested and that I may request and receive a copy of this form. A photocopy of this form will be as valid as the original. In addition, I authorize Protective Life Insurance Company or its reinsurers to make a brief report of any personal health information to the MIB.

FROM AMERICAN RED CROSS PAMPHLET - HIV & AIDS: GET THE FACTS

HIV & AIDS
AIDS is one of the leading causes of death for Americans between the ages of 25 and 44, according to the Centers for Disease Control and Prevention (CDC). Many of the people who are infected with HIV today did not believe they were at risk.

HIV is serious. HIV is deadly. HIV will be with us for a long time. You don't have to get HIV if you follow some simple rules of prevention. The following information about HIV infection and AIDS will help you and those you love learn to protect yourselves.

FACT: AIDS is caused by a virus called HIV.
HIV stands for human immunodeficiency virus. It is the virus that causes AIDS – acquired immunodeficiency syndrome. HIV is spread from one person to another through sex and blood-to-blood contact. When someone becomes infected with HIV, the virus attacks that person's immune system (the system that defends the body from illness). A person develops AIDS when his or her immune system becomes so damaged that it can no longer fight off diseases and infections. These diseases and infections can be fatal. Most people get infected with HIV by having unprotected sex or sharing needles with someone who already has the virus. HIV does not discriminate. Anyone can get HIV.

FACT: People infected with HIV may look and feel healthy for a long time.
It may take up to 10 years for people who are infected with HIV to develop AIDS. They may look and feel healthy for years after becoming infected. They may not know they are infected. Even if they don't look or feel sick, they can infect others.

FACT: When signs of illness do appear, they vary from person to person.
Some people get fevers or diarrhea. Most people get swollen glands that won't clear up. Many lose weight for no apparent reason. This is because the virus harms the body's defenses (immune system). When people develop AIDS, they may have illnesses that healthy people would usually resist. Only a blood test can tell if someone is infected with HIV. Only a doctor can diagnose AIDS.

FACT: You cannot "catch" HIV like you do a cold or flu.
Unlike many other viruses, HIV is not spread through the air or water. HIV is not spread through everyday casual contact.

You cannot get HIV from – handshakes, hugs, coughs or sneezes, sweat or tears, mosquitoes or other insects, pets, eating food prepared by someone else, being around an infected person. **Or from using** – swimming pools, toilet seats, phones or computers, straws, spoons, or cups, drinking fountains.

FACT: Most people with HIV or AIDS got the virus by having sex or sharing needles with someone who was already infected – even once may put you at risk.
These are the most common ways in which HIV is spread: Having vaginal, anal, or oral sex without a latex condom, with someone who has HIV. Sharing needles or syringes with someone who is infected with HIV. From an infected mother to her baby during pregnancy, childbirth, or, rarely, through breast feeding.

FACT: You can protect yourself from the virus.
The best ways to prevent HIV infection are: Do not have sex. You can get infected from even one sexual experience. Avoid contact with another person's blood, semen, or vaginal fluid. Do not shoot drugs. Never share any kind of needle or syringe. Any object that breaks the skin should not be shared. Do not use drugs or alcohol. They can keep you from thinking clearly and cause you to make unwise decisions. **If you are sexually active** – have sex only with a partner who is not infected, who has sex only with you, and who does not shoot drugs or share needles and syringes. Keep in mind that it is difficult to know these things about another person. **Always use a latex condom** for any kind of sex because it's possible you won't know if your partner is infected. **Make smart decisions.** Whether you have sex and whether you use condoms are decisions you can make over and over. You can choose not to have sex, even if you have had sex in the past. You can choose to use condoms even if you have not used condoms in the past. Use what you have learned to make decisions about sex that are good for you and for your partner. Get the **latest information** from the CDC.

FACT: Latex condoms (rubbers) can help prevent HIV infection.
Latex condoms can help lower your risk of HIV infection during sex, as well as your risk of contracting other sexually transmitted diseases (STDs). Latex condoms act as an effective barrier to diseases. But condoms are not foolproof. They don't completely eliminate the risk of becoming infected because they can break, tear, or slip off. They must be put on before genital contact. And they must be used the right way – from start to finish – every time for vaginal, anal, and oral sex. **Find out how.**

Birth control pills and diaphragms will not protect you or your partner from HIV or other STDs.

FACT: It is impossible for a donor to get HIV from giving blood or plasma.
In the United States, every piece of equipment (needles, tubing, containers) used to draw blood is sterile and brand new. It is used only once, and then destroyed. You cannot get HIV from giving blood.

FACT: The chances of getting HIV from a blood transfusion in the United States are now extremely low.
Early in the AIDS epidemic, some people became infected with HIV through infected blood in the nations' blood supply. Since then, the risk of getting an HIV-contaminated transfusion has dropped dramatically and is now estimated to be two in one million units of blood. The Red Cross and other blood banks use a combination of ways to protect the blood supply, including –

Screening of donors. Since 1983, those who want to give blood are not allowed to give blood if they indicate they are at risk of being infected with HIV.

Testing donated blood and plasma for signs of HIV since 1985, when tests became available. If a test shows the presence of HIV, that blood is destroyed. Over time, testing methods have greatly improved. However, testing cannot completely eliminate the risk of infected blood. If someone donates blood or plasma soon after becoming infected, current tests may not always be able to detect the presence of the virus.

FACT: There are blood tests for HIV.
If you think you may be infected with HIV, you may want to consider taking an antibody blood test and getting counseling both before and after being tested. These blood tests look for the presence of HIV antibodies in the blood as signs of the virus. The body almost always develops antibodies to fight off viruses that enter the blood stream.

The "window period" affects test results……. Current blood tests are over 99 percent accurate. However, there is usually a window period from a few weeks to a few months after a person becomes infected for enough antibodies to develop to be detected in a blood test. For this reason, if someone was infected recently, the test may not yet show that the person is infected. Contact your local public health department, AIDS service organization, Red Cross chapter, or doctor's office for more information about testing and HIV counseling.

FACT: So far, there is no vaccine for HIV or a cure for AIDS.
Some medicines that are now available help to treat the symptoms of AIDS patients and allow them to live more comfortably. None of these medicines can keep a person from becoming infected with HIV. None of the treatments can cure AIDS. But people can prevent HIV infection by learning the facts and acting on them. Find out more about **HIV/AIDS treatment.**

FACT: You can help fight the battle against HIV and AIDS by being a volunteer.
Volunteers are always needed. They can answer AIDS hotlines and help teach others about HIV and AIDS. They can help people living with AIDS by shopping for them or bringing meals to their homes. They can help raise funds to fight this epidemic. Call **your local Red Cross chapter** or AIDS service organization to learn how you can help.

To learn more facts about HIV and AIDS, order the American Red Cross **HIV/AIDS Facts Book**.

Further information about HIV/AIDS can be obtained from your Red Cross chapter, local or state health department, other community agencies, the National AIDS Network agency, or the National AIDS Hot Line. The Hot Line number is 1-800-342-AIDS.

1. Provide the consumer, not later than the date the policy or contract is delivered, with a concise summary of the policy or contract to be issued.

2. Allow a twenty day period following the delivery of the policy during which time the consumer may surrender the new policy for a full refund;

3. Advise the present insurance company(ies) of the pending replacement.

For value received, I hereby assign and transfer to Protective Life Insurance Company (Protective Life) all right, title, and interest to the above listed policy(ies) in an exchange intended to qualify under Section 1035 of the Internal Revenue Code. However, this assignment and all other terms and agreements set forth below are conditioned upon Protective Life's underwriting and approving a new life insurance policy on the life of the Insured(s) named above. This conditional assignment will not become effective unless and until Protective Life approves a new life insurance policy.

I understand that if Protective Life approves a new life insurance policy on the life of the Insured(s) named above, then Protective Life will surrender the assigned policy(ies) and it/they will no longer be in force or effect as of the date of surrender. I further understand that, if Protective Life approves the new life insurance policy, Protective Life will collect whatever cash surrender values are available from the existing insurance company on the assigned policy(ies) and apply such amount received as premium on the new life insurance policy. I understand that the cash surrender value of the policy on the actual date of surrender is likely to be different from the cash surrender value of the policy today. This is especially true if the policy to be surrendered is a variable policy, since the cash surrender value of a variable policy fluctuates with the market. I agree that Protective Life assumes no responsibility if the full scheduled cash surrender values of the assigned policy(ies) are not received.

I certify that if the above listed policy(ies) is/are not attached to this conditional assignment that it/they has/have been lost or destroyed. I hereby waive all rights and benefits under such policy(ies) and agree to return it/them to you if it/they comes/come into my possession.

I understand and agree that I will be responsible for keeping the above listed policy(ies) in force by paying any premiums as they become due until such time as Protective Life notifies me in writing that I have been issued a new life insurance policy.

I understand that under Section 1035, reporting may be required for federal income tax purposes. The replaced company is required to report all exchanges of insurance contracts on Form 1099-R, including tax-free exchanges under Section 1035 in situations in which a policyholder has an outstanding policy loan at the time of exchange. If there is an outstanding policy loan at the time of the exchange, the transaction may not be characterized as tax-free. In fact, any gain will be taxed to the extent of the outstanding policy loan. Accordingly, I understand that it is advisable when filing my individual federal income tax return that I enclose a copy of the reporting form (Form 1099-R) with an explanation that the policy was exchanged pursuant to Section 1035 or otherwise and that Protective Life has no responsibility for the validity of this Assignment.

Please Check One: ☐ I have enclosed the original policy(ies) to be exchanged. ☐ I certify that the original policy(ies) has/have been lost or destroyed. To the best of my knowledge, the original policy(ies) is/are not in the possession or control of any other person.

REQUIRED CALIFORNIA DISCLOSURE – For Universal Life Policies with No-Lapse Guarantees

This policy is guaranteed to stay in force for a specified number of years as long as you meet the requirements of the Policy, including the Minimum Monthly Premium provision found in the policy contract. This provision is also known as a no-lapse guarantee, and a general description of the provision is included in the Narrative Summary section of the Basic Illustration.

While this policy provides a no-lapse guarantee, it may provide nonforfeiture benefits, such as cash surrender values, which are less than those that would be provided if the guarantee were issued as a separate policy, such as a term policy. If a separate term policy has higher nonforfeiture benefits, the premiums for the separate policy might be higher than the premiums for the no-lapse guarantee provided in this policy. Therefore, when considering the purchase of this policy, you should compare the value of higher nonforfeiture benefits, such as cash surrender values, versus the premiums required to keep your insurance coverage in force.

REQUIRED SOUTH CAROLINA DISCLOSURE – For Universal Life Policies with No-Lapse Guarantees

If there is no policy debt or partial surrenders, this policy is guaranteed to stay in force during the no lapse period as long as you have paid the required minimum premiums. This guarantee could be provided by a separate policy (such as a term policy). However, the nonforfeiture benefits (such as cash surrender value) in this policy may be significantly less valuable than those provided by the separate policy. So, if you fail to pay a premium within a specified period of time from its due date or otherwise cause this policy to terminate early, the benefits paid to you upon termination could be much less than would customarily be paid if provided by the separate policy.

When thinking about purchasing this policy, you should consider the tradeoff you may be making between having significantly smaller nonforfeiture benefits (such as a cash surrender value) available to you upon surrender of the policy versus the reduction in premium, if any, you may receive for not having these benefits.
