#### HIV ANTIBODY TEST INFORMATION FORM FOR INSURANCE APPLICANT

#### **AIDS**

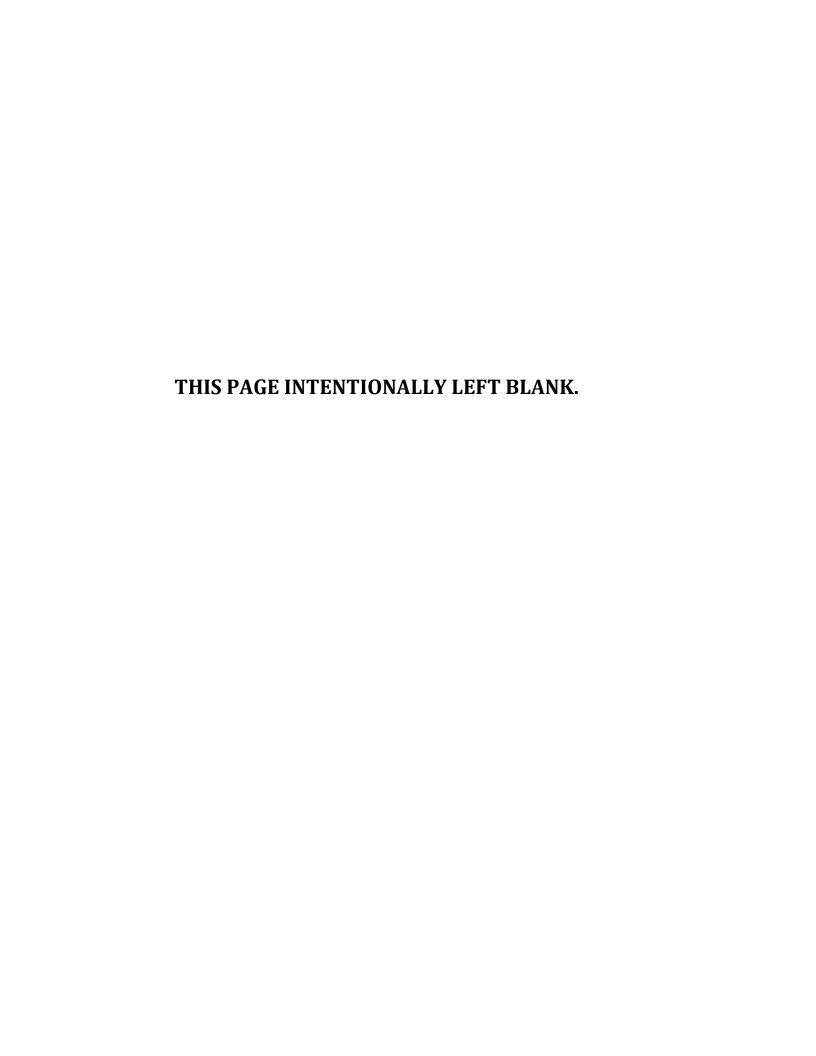

Acquired Immunodeficiency Syndrome (AIDS) is a life-threatening disorder of the immune system, caused by a virus, HIV. The virus is transmitted by sexual contact with an infected person, from an infected mother to her newborn infant, or by exposure to infected blood (as in needle sharing during IV drug use). Persons at high risk of contracting AIDS include males who have had sexual contact with another man, intravenous drug users, hemophiliacs, and persons who have had sexual contact with any of these persons. AIDS does not typically develop until a person has been infected with HIV for several years. A person may remain free of symptoms for years after becoming infected. Infected persons have a 25 percent to 50 percent chance of developing AIDS over the next 10 years.

#### The HIV antibody test:

Before consenting to testing, please read the following important information:

- 1. Purpose. This test is being run to determine whether you may have been infected with HIV. If you are infected, you are probably not insurable. This test is not a test for AIDS; AIDS can only be diagnosed by medical evaluation.
- Positive test results. If you test positive, you should seek medical follow-up with your personal physician. If your test is positive, you may be infected with HIV.
- 3. Accuracy. An HIV test will be considered positive only after confirmation by a laboratory procedure that the state health officer has determined to be highly accurate. Nonetheless, the HIV antibody test is not 100 percent accurate. Possible errors include:
  - a. False positives: The test gives a positive result, even though you are not infected. This happens only rarely and is more common in persons who have not engaged in high risk behavior. Retesting should be done to help confirm the validity of a positive test.
  - b. False negatives: The test gives a negative result, even though you are infected with HIV. This happens most commonly in recently infected persons; it takes at least 4 to 12 weeks for a positive test result to develop after a person is infected.
- 4. Side effects. A positive test result may cause you significant anxiety. A positive test may result in uninsurability for life, health, or disability insurance policies for which you may apply in the future. Although prohibited by law, discrimination in housing, employment, or public accommodations may result if your test results become known to others. A negative result may create a false sense of security.
- 5. Disclosure of results. A positive test result will be disclosed to you. You may choose to have information about your HIV tests results communicated to you through your physician, or through the alternative testing site.
- 6. Confidentiality. Like all medical information, HIV test results are confidential. An insurer, insurance agent, or insurance-support organization is required to maintain the confidentiality of HIV test results. However, certain disclosures of your test results may occur, including those authorized by consent forms that you may have signed as part of your overall application. Your test results may be provided to the MIB, LLC, a national insurance data bank. The Insurer will make a brief report of any personal health information to the MIB. Your insurance agent will provide you with additional written information about this subject at your request.
- 7. Prevention. Persons who have a history of high-risk behavior should change these behaviors to prevent getting or giving AIDS, regardless of whether they are tested. Specific important changes in behavior include safe sex practices (including condom use of sexual contact with someone other than a long-term monogamous partner) and not sharing needles.
- 8. Information. Further information about HIV testing and AIDS can be obtained by calling the national AIDS hotline at: 1-800-342-2437.

#### IMPORTANT NOTICE: REPLACEMENT OF LIFE INSURANCE OR ANNUITIES

This document must be signed by the applicant and the insurance producer/agent, if there is one, and a copy left with the applicant.

You are contemplating the purchase of a life insurance policy or annuity contract. In some cases this purchase may involve discontinuing or changing an existing policy or contract. If so, a replacement is occurring. Financed purchases are also considered replacements.

A replacement occurs when a new life insurance policy or annuity contract is purchased and, in connection with the sale, you discontinue making premium payments on the existing life insurance policy or annuity contract, or an existing life insurance policy or annuity contract is surrendered, forfeited, assigned to the replacing insurer, or otherwise terminated or used in a financed purchase.

A financed purchase occurs when the purchase of a new life insurance policy involves the use of funds obtained by the withdrawal or surrender of or by borrowing some or all of the life insurance policy values, including accumulated dividends, of an existing life insurance policy, to pay all or part of any premium or payment due on the new life insurance policy. A financed purchase is a replacement.

You should carefully consider whether a replacement is in your best interests. You will pay acquisition costs and there may be surrender costs deducted from your life insurance policy or annuity contract. You may be able to make changes to your existing life insurance policy or annuity contract to meet your insurance needs at less cost. A financed purchase will reduce the value of your existing life insurance policy and may reduce the amount paid upon the death of the insured.

We want you to understand the effects of replacements and ask that you answer the following questions and consider the questions on the back of

You should make a careful comparison of the costs and benefits of your existing life insurance policy or annuity contract and the proposed life insurance policy or annuity contract. One way to do this is to ask the company or insurance producer/agent that sold you your existing life insurance policy or annuity contract to provide you with information concerning your existing life insurance policy or annuity contract. This may include an illustration of how your existing life insurance policy or annuity contract is working now and how it would perform in the future based on certain assumptions. Illustrations should not, however, be used as a sole basis to compare policies or annuity contracts. You should discuss the following with your agent to determine whether replacement or financing your purchase makes sense:

#### PREMIUMS:

Are they affordable?

Could they change?

You're older - are premiums higher for the proposed new life insurance policy?

How long will you have to pay premiums on the new life insurance policy? On the old life insurance policy?

#### **POLICY VALUES:**

New policies usually take longer to build cash values and to pay dividends.

Acquisition costs for the old life insurance policy may have been paid; you will incur costs for the new one.

What surrender charges do the policies have?

What expense and sales charges will you pay on the new life insurance policy?

Does the new life insurance policy provide more insurance coverage?

#### **INSURABILITY:**

If your health has changed since you bought your old life insurance policy, the new one could cost you more, or you could be turned down.

You may need a medical exam for a new life insurance policy.

(Claims on most new policies for up to the first two years can be denied based on inaccurate statements. Suicide limitations may begin anew on the coverage.)

#### IF YOU ARE KEEPING THE OLD LIFE INSURANCE POLICY AS WELL AS THE NEW LIFE INSURANCE POLICY:

How are premiums for both policies being paid?

How will the premiums on your existing life insurance policy be affected?

Will a loan be deducted from death benefits?

What values from the old life insurance policy are being used to pay premiums?

#### IF YOU ARE SURRENDERING AN ANNUITY OR INTEREST SENSITIVE LIFE PRODUCT:

Will you pay surrender charges on your old annuity contract?

What are the interest rate guarantees for the new annuity contract?

Have you compared the annuity contract charges or other life insurance policy expenses?

#### OTHER ISSUES TO CONSIDER FOR ALL TRANSACTIONS:

What are the tax consequences of buying the new life insurance policy?

Is this a tax-free exchange? (See your tax advisor.)

Is there a benefit from favorable "grandfathered" treatment of the old life insurance policy under the Federal Internal Revenue Tax Code?

Will the existing insurer be willing to modify the old life insurance policy?

How does the quality and financial stability of the new company compare with your existing company?

### IMPORTANT NOTICE: REPLACEMENT OF LIFE INSURANCE OR ANNUITIES

This document must be signed by the applicant and the insurance producer/agent, if there is one, and a copy left with the applicant.

You are contemplating the purchase of a life insurance policy or annuity contract. In some cases this purchase may involve discontinuing or changing an existing policy or contract. If so, a replacement is occurring. Financed purchases are also considered replacements.

A replacement occurs when a new life insurance policy or annuity contract is purchased and, in connection with the sale, you discontinue making premium payments on the existing life insurance policy or annuity contract, or an existing life insurance policy or annuity contract is surrendered, forfeited, assigned to the replacing insurer, or otherwise terminated or used in a financed purchase.

A financed purchase occurs when the purchase of a new life insurance policy involves the use of funds obtained by the withdrawal or surrender of or by borrowing some or all of the life insurance policy values, including accumulated dividends, of an existing life insurance policy, to pay all or part of any premium or payment due on the new life insurance policy. A financed purchase is a replacement.

You should carefully consider whether a replacement is in your best interests. You will pay acquisition costs and there may be surrender costs deducted from your life insurance policy or annuity contract. You may be able to make changes to your existing life insurance policy or annuity contract to meet your insurance needs at less cost. A financed purchase will reduce the value of your existing life insurance policy and may reduce the amount paid upon the death of the insured.

We want you to understand the effects of replacements and ask that you answer the following questions and consider the questions on the back of

•	Are you considering discontinuing making premium payments, surrendering, forfeiting, assigning to the insurer, or otherwise terminating your existing life insurance policy or annuity contract?

### REQUIRED CALIFORNIA DISCLOSURE - For Universal Life Policies with No-Lapse Guarantees

This policy is guaranteed to stay in force for a specified number of years as long as you meet the requirements of the Policy, including the Minimum Monthly Premium provision found in the policy contract. This provision is also known as a no-lapse guarantee, and a general description of the provision is included in the Narrative Summary section of the Basic Illustration.

While this policy provides a no-lapse guarantee, it may provide nonforfeiture benefits, such as cash surrender values, which are less than those that would be provided if the guarantee were issued as a separate policy, such as a term policy. If a separate term policy has higher nonforfeiture benefits, the premiums for the separate policy might be higher than the premiums for the no-lapse guarantee provided in this policy. Therefore, when considering the purchase of this policy, you should compare the value of higher nonforfeiture benefits, such as cash surrender values, versus the premiums required to keep your insurance coverage in force.

### REQUIRED SOUTH CAROLINA DISCLOSURE - For Universal Life Policies with No-Lapse Guarantees

If there is no policy debt or partial surrenders, this policy is guaranteed to stay in force during the no lapse period as long as you have paid the required minimum premiums. This guarantee could be provided by a separate policy (such as a term policy). However, the nonforfeiture benefits (such as cash surrender value) in this policy may be significantly less valuable than those provided by the separate policy. So, if you fail to pay a premium within a specified period of time from its due date or otherwise cause this policy to terminate early, the benefits paid to you upon termination could be much less than would customarily be paid if provided by the separate policy.

When thinking about purchasing this policy, you should consider the tradeoff you may be making between having significantly smaller nonforfeiture benefits (such as a cash surrender value) available to you upon surrender of the policy versus the reduction in premium, if any, you may receive for not having these benefits.
