HIV TEST - INFORMED CONSENT FORM

THIS FORM MUST BE READ ALOUD TO THE APPLICANT PRIOR TO IT BEING SIGNED.

BACKGROUND

Acquired Immunodeficiency Syndrome (AIDS) is a life-threatening disorder of the immune system. It is caused by a virus called HIV. The virus is spread by sexual contact with an infected person, by exposure to infected blood (as in needle sharing during intravenous drug use or, rarely, as a result of a blood transfusion), or from an infected mother to her newborn infant.

To evaluate your eligibility for insurance or insurance benefits, it is requested that you provide a sample of your body fluid or other specimen for testing and analysis. One of the tests is to determine the presence of antibodies to the HIV virus. This test is actually a series of tests performed upon your body fluid or other specimen sample by a medically accepted procedure which is extremely reliable. The testing will be performed by a licensed laboratory.

DISCLOSURE OF TEST RESULTS

All test results will be treated confidentially. The results of the test will be reported to the insurer named above. The results will also be reported to its affiliates, reinsurers, or contractors in connection with insurance you have or for which you have applied.

In addition, if your HIV antibody test is abnormal (positive), the insurer may request an additional sample as necessary. If the insurer is a member of the MIB, LLC (MIB) and you choose to decline that request, the insurer will report to MIB a generic code which specifies only that a test has been ordered and not received. If the final test result for HIV antibodies is other than normal, a generic code signifying a non-specific blood abnormality may be made known to the MIB as described in the notice given to you at the time of application. The MIB is a membership organization of life and health insurance companies which operates as an information exchange on behalf of its members. If you apply to another MIB member company for life or health insurance coverage or make a claim for benefits to such a company, the MIB, upon request, will supply the information in its file to that member. The insurer will make a brief report of any personal health information to the MIB. The fact that the test has been done and the results of the test will not be otherwise disclosed except as may be required by law or as authorized by you.

TEST RESULTS

Positive Test Results. While positive test results do not necessarily mean that you have AIDS, they do mean that you are at serious risk of developing AIDS or AIDS-related conditions. You may be infected with HIV and infectious to others. You should seek medical follow-up with your personal health care provider. The insurer will contact you for the name of the health care provider to whom you may want your test results disclosed.

Test Accuracy. HIV test results are not 100% accurate. Possible errors include:

(a) False positives: The test gives a positive result, even though you are not infected. This happens only rarely and is more common in persons who have not engaged in high risk behaviors. Retesting should be done to help confirm the validity of a positive test.

(b) False negatives: The test gives a negative result, even though you are infected with HIV. This is most likely to happen in recently infected persons; it takes at least 4 to 12 weeks for a positive test result to develop after a person is infected, and may take as long as 6 to 12 months.

RISK FROM HAVING THE TESTS

A positive test result may cause you significant anxiety. It also will adversely affect your insurance application and may result in uninsurability for life, health, or disability insurance for which you may apply in the future.

YOU HAVE THE RIGHT TO ASK QUESTIONS AND OBTAIN FURTHER INFORMATION

If you have any questions relating to AIDS, the HIV test and the consequences of being tested or not being tested, you are entitled to answers to those questions by the person offering the test or other knowledgeable person before you agree to testing.

OTHER SOURCES OF INFORMATION

For more information about AIDS and the HIV test you may call the Maine Bureau of Health at (207) 287-3747. You may also call the Maine AIDS Hotline at 1-800-851-AIDS.

I have read and I understand this Notice of AIDS Virus (HIV) Antibody Testing and Consent for Testing. For my information, I have been given written material about AIDS. I voluntarily consent to the withdrawal of body fluid or other specimen from me by needle, the testing of my body fluid or other specimen for HIV antibodies, and the disclosure of the test results as described above.

FROM AMERICAN RED CROSS PAMPHLET - HIV & AIDS: GET THE FACTS

HIV & AIDS

AIDS is on e of the leading causes of death for Americans between the ages of 25 and 44, according to the Centers for Disease Control and Prevention (CDC). Many of the people who are infected with HIV today did not believe they were at risk.

HIV is serious. HIV is deadly. HIV will be with us for a long time. You don't have to get HIV if you follow some simple rules of prevention. The following information about HIV infection and AIDS will help you and those you love learn to protect yourselves.

FACT: AIDS is caused by a virus called HIV.

HIV stands for human immunodeficiency virus. It is the virus that causes AIDS - acquired immunodeficiency syndrome. HIV is spread from one person to another through sex and blood-to-blood contact. When someone becomes infected with HIV, the virus attacks that person's immune system (the system that defends the body from illness). A person develops AIDS when his or her immune system becomes so damaged that it can no longer fight off diseases and infections. These diseases and infections can be fatal. Most people get infected with HIV by having unprotected sex or sharing needles with someone who already has the virus. HIV does not discriminate. Anyone can get HIV.

FACT: People infected with HIV may look and feel healthy for a long time.

It may take up to 10 years for people who are infected with HIV to develop AIDS. They may look and feel healthy for years after becoming infected. They may not know they are infected. Even if they don't look or feel sick, they can infect others.

FACT: When signs of illness do appear, they vary from person to person.

Some people get fevers or diarrhea. Most people get swollen glands that won't clear up. Many lose weight for no apparent reason. This is because the virus harms the body's defenses (immune system). When people develop AIDS, they may have illnesses that healthy people would usually resist. Only a blood test can tell if someone is infected with HIV. Only a doctor can diagnose AIDS.

FACT: You cannot "catch" HIV like you do a cold or flu.

Unlike many other viruses, HIV is not spread through the air or water. HIV is not spread through everyday casual contact.

You cannot get HIV from - handshakes, hugs, coughs or sneezes, sweat or tears, mosquitoes or other insects, pets, eating food prepared by someone else, being around an infected person. **Or from using** - swimming pools, toilet seats, phones or computers, straws, spoons, or cups, drinking fountains.

FACT: Most people with HIV or AIDS got the virus by having sex or sharing needles with someone who was already infected - even once may put you at risk.

These are the most common ways in which HIV is spread: Having vaginal, anal, or oral sex without a latex condom, with someone who has HIV. Sharing needles or syringes with someone who is infected with HIV. From an infected mother to her baby during pregnancy, childbirth, or, rarely, through breast feeding.

FACT: You can protect yourself from the virus.

The best way to prevent HIV infection are: Do not have sex. You can get infected from even one sexual experience. Avoid contact with another person's blood, semen, or vaginal fluid. Do not shoot drugs. Never share any kind of needle or syringe. Any object that breaks the skin should not be shared. Do not use drugs or alcohol. They can keep you from thinking clearly and cause you to make unwise decisions. **If you are sexually active** - have sex only with a partner who is not infected, who has sex only with you, and who does not shoot drugs or share needles and syringes. Keep in mind that it is difficult to know these things about another person. **Always use a latex condom** for any kind of sex because it's possible you wont' know if your partner is infected. **Make smart decisions.** Whether you have sex and whether you use condoms are decisions you can make over and over. You can choose not to have sex, even if you have had sex in the past. You can choose to use condoms even if you have not used condoms in the past. Use what you have learned to make decisions about sex that are good for you and for your partner. Get the **latest information** from the CDC.

FACT: Latex condom (rubbers) can help prevent HIV infection.
Latex condoms can help lower your risk of HIV infection during sex, as well as your risk of contracting other sexually transmitted diseases (STDs). Latex condoms act as an effective barrier to diseases. But condoms are not foolproof. They don't completely eliminate the risk of becoming infected because they can break, tear, or slip off. They must be put on before genital contact. And they must be used the right way - from start to finish - every time for vaginal, anal, and oral sex. **Find out how.**

Birth control pills and diaphragms will not protect you or your partner from HIV or other STDs.

FACT: It is impossible for a donor to get HIV from giving blood or plasma.
In the United States, every piece of equipment (needles, tubing, containers) used to draw blood is sterile and brand new. It is used only once, then destroyed. You cannot get HIV from giving blood.

FACT: The chances of getting HIV from a blood transfusion in the United States are now extremely low.
Early in the AIDS epidemic, some people became infected with HIV through infected blood in the nation's blood supply. Since then, the risk of getting an HIV-contaminated transfusion has dropped dramatically and is now estimated to be two in one million units of blood. The Red Cross and other blood banks use a combination of ways to protect the blood supply, including -

Screening of donors. Since 1983, those who want to give blood are not allowed to give blood if they indicate they are at risk of being infected with HIV.

Testing donated blood and plasma for signs of HIV since 1985, when tests became available. If a test shows the presence of HIV, that blood is destroyed. Over time, testing methods have greatly improved. However, testing cannot completely eliminate the risk of infected blood. If someone donates blood or plasma soon after becoming infected, current tests may not always be able to detect the presence of the virus.

FACT: There are blood tests for HIV.
If you think you may be infected with HIV, you may want to consider taking an antibody blood test and getting counseling both before and after being tested. These blood tests look for the presence of HIV antibodies in the blood as signs of the virus. The body almost always develops antibodies to fight off viruses that enter the blood stream.

The "window period" affects test results….. Current blood tests are over 99 percent accurate. However, there is usually a window period from a few weeks to a few months after a person becomes infected for enough antibodies to develop to be detected in a blood test. For this reason, if someone was infected recently, the test may not yet show that the person is infected. Contact your local public health department, AIDS service organization, Red Cross chapter, or doctor's office for more information about testing and HIV counseling.

FACT: So far, there is no vaccine for HIV or a cure for AIDS.
Some medicines that are now available help to treat the symptoms of AIDS patients and allow them to live more comfortably. None of these medicines can keep a person from becoming infected with HIV. None of the treatments can cure AIDS. But people can prevent HIV infection by learning the facts and acting on them. Find out more about **HIV/AIDS treatment.**

FACT: You can help fight the battle against HIV and AIDS by being a volunteer.
Volunteers are always needed. They can answer AIDS hotlines and help teach others about HIV and AIDS. They can help people living with AIDS by shopping for them or bringing meals to their homes. They can help raise funds to fight this epidemic. Call **your local Red Cross chapter** or AIDS service organization to learn how you can help.

To learn more facts about HIV and AIDS, order the American Red Cross HIV/AIDS Facts Book.

Further information about HIV/AIDS can be obtained from your Red Cross chapter, local or state health department, other community agencies, the National AIDS Network agency, or the National AIDS Hot Line. The Hot Line number is 1-800-342-AIDS.

BUYING LIFE INSURANCE

When you buy life insurance, you want a policy which fits your needs without costing too much.

First, decide how much you need - and for how long - and what you can afford to pay. Keep in mind the major reason you buy life insurance is to cover the financial effects of unexpected or untimely death. Life insurance can also be one of many ways you plan for the future.

Next, learn what kinds of policies will meet your needs and pick the one that best suits you.

Then, choose the combination of policy premium and benefits that emphasizes protection in case of early death, or benefits in case of long life, or a combination of both.

A good life insurance producer, consultant, or company will be able and willing to help you with each of these shopping steps.

If you are going to make a good choice when you buy life insurance, you need to understand which kinds are available. If one kind does not seem to fit your needs, ask about the other kinds which are described in this guide. If you feel that you need more information than is given here, you may want to check with a life insurance producer, consultant, or company or books on life insurance in your public library.

WHAT ABOUT THE POLICY YOU HAVE NOW

If you are thinking about dropping a life insurance policy, here are some things you should consider:

* If you decide to replace your policy, don't cancel your old policy until you have received the new one. You then have a minimum period to review your new policy and decide if it is what you wanted.

* It may be costly to replace a policy. Much of what you paid in the early years of the policy you have now, paid for the company's cost of selling and issuing the policy. You may pay this type of cost again if you buy a new policy.

* Ask your tax advisor if dropping your policy could affect your income taxes.

* If you are older or your health has changed, premiums for the new policy will often be higher. You will not be able to buy a new policy if you are not insurable.

* You may have valuable rights and benefits in the policy you now have that are not in the new one.

* If the policy you have now no longer meets your needs, you may not have to replace it. You might be able to change your policy or add to it to get the coverage or benefits you now want.

* At least in the beginning, a policy may pay no benefits for some causes of death covered in the policy you have now.

In all cases, if you are thinking of buying a new policy, check with the agent or company that issued you the one you have now. When you bought your old policy, you may have seen an illustration of the benefits of your policy. Before replacing your policy, ask your agent or company for an updated illustration. Check to see how the policy has performed and what you might expect in the future, based on the amounts the company is paying now.

HOW MUCH DO YOU NEED

Here are some questions to ask yourself:

* How much of the family income do I provide? If I were to die early, how would my survivors, especially my children, get by? Does anyone else depend on me financially, such as a parent, grandparent, brother or sister?

* Do I have children for whom I'd like to set aside money to finish their education in the event of my death?

* How will my family pay final expenses and repay debts after my death?

* Do I have family members or organizations to whom I would like to leave money?

* Will there be estate taxes to pay after my death?

* How will inflation affect future needs?

As you figure out what you have to meet these needs, count the life insurance you have now, including any group insurance where you work or veteran's insurance. Don't forget Social Security and pension plan survivor's benefits. Add other assets you have: savings, investments, real estate and personal property. Which assets would your family sell or cash in to pay expenses after your death?

CHOOSING THE RIGHT KIND

All life insurance policies agree to pay an amount of money if you die. But all policies are not the same. There are two basic kinds of life

1. Term Insurance
2. Cash Value Life Insurance

Term Insurance

Term Insurance is death protection for a "term" of one or more years. Death benefits will be paid only if you die within that term of years. Term insurance generally provides the largest immediate death protection for your premium dollar.

Some term insurance policies are "renewable" for one or more additional terms even if your health has changed. Each time you renew the policy for a new term premiums will be higher. You should check the premiums at older ages and the length of time the policy can be continued.

Some term insurance policies are also "convertible." This means that before the end of the conversion period, you may trade the term policy for a cash value policy even if you are not in good health. Premiums for the new policy will be higher than you have been paying for the term insurance.

Cash Value Life Insurance

Cash Value Life Insurance is a type of insurance where the premiums charged are higher at the beginning than they would be for the same amount of term insurance. The part of the premium that is not used for the cost of insurance is invested by the company and builds up a cash value that may be used in a variety of ways. You may borrow against a policy's cash value by taking a policy loan. If you don't pay back the loan and the interest on it, the amount you owe will be subtracted from the benefits when you die, or from the cash value if you stop paying premiums and take out the remaining cash value. You can also use your cash value to keep insurance protection for a limited time or to buy a reduced amount without having to pay more premiums. You also can use the cash value to increase your income in retirement or to help pay for needs such as a child's tuition without canceling the policy. However, to build up this cash value, you must pay higher premiums in the earlier years of the policy. Cash value life insurance may be one of several types: whole life, universal life and variable life are all types of cash value insurance.

Whole Life Insurance gives death protection for as long as you live. The most common type is called "straight life" or "ordinary life" insurance, for which you pay the same premiums for as long as you live. These premiums can be several times higher than you would pay initially for the same amount of term insurance. But they are smaller than the premiums you would eventually pay if you were to keep renewing a term insurance policy until your later years.

Some whole life policies let you pay premiums for a shorter period such as 20 years, or until age 65. Premiums for these policies are higher than for ordinary life insurance since the premium payments are squeezed into a shorter period.

Universal Life Insurance is a kind of flexible policy that lets you vary your premium payments. You can also adjust the face amount of your coverage. Increases may require proof that you qualify for the new death benefit. The premiums you pay (less expense charges) go into a policy account that earns interest. Charges are deducted from the account. If your yearly premium payment plus the interest your account earns is less than the charges, your account value will become lower. If it keep dropping, eventually your coverage will end. To prevent that, you may need to start making premium payments, or increase your premium payments, or lower your death benefits. Even if there is enough in your account to pay the premiums, continuing to pay premiums yourself means that you build up more cash value.

Variable Life Insurance is a kind of insurance where the death benefits and cash values depend on the investment performance of one or more separate accounts, which may be invested in mutual funds or other investments allowed under the policy. Be sure to get the prospectus from the company when buying this kind of policy and **STUDY IT CAREFULLY.** You will have higher death benefits and cash value if the underlying investments do well. Your benefits and cash value will be lower or may disappear if the investments you chose didn't do as well as you expected. You may pay an extra premium for a guaranteed death benefit.

FINDING A GOOD VALUE IN LIFE INSURANCE

After you have decided which kind of life insurance is best for you, compare similar policies from different companies to find which one is likely to give you the best value for your money. A simple comparison of the premiums is not enough. There are other things to consider. For example:

* Do premiums or benefits vary from year to year?
* How much do the benefits build up in the policy?
* What part of the premiums or benefits is not guaranteed?
* What is the effect of interest on money paid and received at different times on the policy?

Once you have decided which type of policy to buy, you should compare similar policies from several companies. Life insurance agents or companies should give you either a life insurance illustration, a cost comparison index, or both. Life insurance illustrations and cost comparison indexes are described below.

Remember that no one company offers the lowest cost at all ages for all kinds and amounts of insurance. You should also consider other factors:

* How quickly does the cash value grow? Some policies have low cash values in the early years that build quickly later on. Other policies have a more level cash value build-up. A year-by-year display of values and benefits can be very helpful. (The producer or company will give you a policy summary or an illustration that will show benefits and premiums for selected years.)
* Are there special policy features that particularly suit your needs?
* How are nonguaranteed values calculated? For example, interest rates are important in determining policy returns. In some companies increases reflect the average interest earnings on all of that company's policies regardless of when issued. In others, the return for policies issued in a recent year, or a group of years, reflects the interest earnings on that group of policies: in this case, amounts paid are likely to change more rapidly when interest rates change.

LIFE INSURANCE ILLUSTRATIONS

You may be thinking of buying a policy where cash values, death benefits, dividends or premiums may vary based on events or situations the company does not guarantee (such as interest rates). If so, you may get an illustration from the producer or company that helps explain how the policy works. The illustration will show how the benefits that are not guaranteed will change as interest rates and other factors change. The illustration will show you what the company guarantees. It will also show you what **could** happen in the future. Remember that nobody know what will happen in the future. You should be ready to adjust your financial plans if the cash value doesn't increase as quickly as shown in the illustration. You will be asked to sign a statement that says you understand that some of the numbers in the illustration are not guaranteed.

COST COMPARISON INDEXES

If you are provided cost comparison indexes, there will be two types:

Life Insurance Surrender Cost Index. This index is useful if you consider the level of the cash values to be of primary importance to you. It helps you compare costs if at some future point in time, such as 10 or 20 years, you were to surrender the policy and take its cash value.

Life Insurance Net Payment Cost Index. This index is useful if your main concern is the benefits that are to be paid at your death and if the level of cash values is of secondary importance to you. It helps you compare costs at some future point in time, such as 10 or 20 years, if you continue paying premiums on your policy and do not take its cash value.

How Do I Use Cost Indexes?

The most important thing to remember when using cost indexes is that a policy with a small index number is generally a better buy than a comparable policy with a larger index number. The following rules are also important:

* Cost comparisons should only be made between similar plans of life insurance. Similar plans are those which provide essentially the same basic benefits and require premium payments for approximately the same period of time. The closer policies are to being identical, the more reliable the cost comparison will be.

* Cost comparison indexes reflect only guaranteed benefits and premiums. If the policy has non-guaranteed elements such as dividends, the actual cost may turn out to be less than what the index reflects.

* Compare index numbers only for the kind of policy, for your age and for the amount you intend to buy. Since no one company offers the lowest cost for all amounts of insurance, it is important that you get the indexes for the actual policy, age and amount which you intend to buy. Just because one company's policy is a good buy for a particular age and amount, you should not assume that all of that company's policies are equally good buys.

* Small differences in index numbers could be offset by other policy features, or differences in the quality of service you may expect from the company or its agent. Therefore, when you find small differences in cost indexes, your choice should be based on something other than cost.

* In any event, you will need other information on which to base your purchase decision. Be sure you can afford the premiums, and that you understand its cash values, dividends and death benefits. You should also make a judgment on how well the life insurance company or agent will provide service in the future to you as a policyholder.

* These life insurance cost indexes apply to new policies and should not be used to determine whether you should drop a policy you have already owned for a while, in favor of a new one. If such a replacement is suggested, you should ask for information from the company which issued the old policy before you take action.

IMPORTANT NOTICE: REPLACEMENT OF LIFE INSURANCE OR ANNUITIES

This document must be signed by the applicant and the insurance producer/agent, if there is one, and a copy left with the applicant.

You are contemplating the purchase of a life insurance policy or annuity contract. In some cases this purchase may involve discontinuing or changing an existing policy or contract. If so, a replacement is occurring. Financed purchases are also considered replacements.

A replacement occurs when a new life insurance policy or annuity contract is purchased and, in connection with the sale, you discontinue making premium payments on the existing life insurance policy or annuity contract, or an existing life insurance policy or annuity contract is surrendered, forfeited, assigned to the replacing insurer, or otherwise terminated or used in a financed purchase.

A financed purchase occurs when the purchase of a new life insurance policy involves the use of funds obtained by the withdrawal or surrender of or by borrowing some or all of the life insurance policy values, including accumulated dividends, of an existing life insurance policy, to pay all or part of any premium or payment due on the new life insurance policy. A financed purchase is a replacement.

You should carefully consider whether a replacement is in your best interests. You will pay acquisition costs and there may be surrender costs deducted from your life insurance policy or annuity contract. You may be able to make changes to your existing life insurance policy or annuity contract to meet your insurance needs at less cost. A financed purchase will reduce the value of your existing life insurance policy and may reduce the amount paid upon the death of the insured.

We want you to understand the effects of replacements and ask that you answer the following questions and consider the questions on the back of this form.

1. Are you considering discontinuing making premium payments, surrendering, forfeiting, assigning to the insurer, or otherwise terminating your existing life insurance policy or annuity contract? ☐ Yes ☐ No

2. Are you considering using funds from your existing policies or annuity contracts to pay premiums due on the new life insurance policy or annuity contract? ☐ Yes ☐ No

If you answered "Yes" to either of the above questions, list each existing life insurance policy or annuity contract you are contemplating replacing (include the name of the insurer, the insured or annuitant, and the life insurance policy or annuity contract number if available) and whether each life insurance policy or annuity contract will be replaced or used as a source of financing:

	INSURER NAME	ANNUITY CONTRACT OR LIFE INSURANCE POLICY #	INSURED OR ANNUITANT	REPLACED (R) or FINANCING (F)
1.				
2.				
3.				

Make sure you know the facts. Contact your existing company or its insurance producer/agent for information about the old life insurance policy or annuity contract. If you request one, an in-force illustration, life insurance policy summary or available disclosure documents must be sent to you by the existing insurer. Ask for and keep all sales material used by the insurance producer/agent in the sales presentation. Be sure that you make an informed decision.

The existing life insurance policy or annuity contract is being replaced because _____.

I certify that the responses herein are, to the best of my knowledge, accurate:

Applicant/Proposed Insured's Signature	Printed Name	Date
Owner's Signature (if other than Applicant/Proposed Insured)	Printed Name	Date
Joint Owner's Signature	Printed Name	Date
Insurance Producer's/Agent Signature	Printed Name	Date

I do not want this notice read aloud to me _____ (Owner/Applicants must initial only if they do not want the notice read aloud.)

A replacement may not be in your best interest, or your decision could be a good one. You should make a careful comparison of the costs and benefits of your existing life insurance policy or annuity contract and the proposed life insurance policy or annuity contract. One way to do this is to ask the company or insurance producer/agent that sold you your existing life insurance policy or annuity contract to provide you with information concerning your existing life insurance policy or annuity contract. This may include an illustration of how your existing life insurance policy or annuity contract is working now and how it would perform in the future based on certain assumptions. Illustrations should not, however, be used as a sole basis to compare policies or annuity contracts. You should discuss the following with your agent to determine whether replacement or financing your purchase makes sense:

PREMIUMS:

Are they affordable?
Could they change?
You're older - are premiums higher for the proposed new life insurance policy?
How long will you have to pay premiums on the new life insurance policy? On the old life insurance policy?

POLICY VALUES:

New policies usually take longer to build cash values and to pay dividends.
Acquisition costs for the old life insurance policy may have been paid; you will incur costs for the new one.
What surrender charges do the policies have?
What expense and sales charges will you pay on the new life insurance policy?
Does the new life insurance policy provide more insurance coverage?

INSURABILITY:

If your health has changed since you bought your old life insurance policy, the new one could cost you more, or you could be turned down.
You may need a medical exam for a new life insurance policy.
(Claims on most new policies for up to the first two years can be denied based on inaccurate statements. Suicide limitations may begin anew on the coverage.)

IF YOU ARE KEEPING THE OLD LIFE INSURANCE POLICY AS WELL AS THE NEW LIFE INSURANCE POLICY:

How are premiums for both policies being paid?
How will the premiums on your existing life insurance policy be affected?
Will a loan be deducted from death benefits?
What values from the old life insurance policy are being used to pay premiums?

IF YOU ARE SURRENDERING AN ANNUITY OR INTEREST SENSITIVE LIFE PRODUCT:

Will you pay surrender charges on your old annuity contract?
What are the interest rate guarantees for the new annuity contract?
Have you compared the annuity contract charges or other life insurance policy expenses?

OTHER ISSUES TO CONSIDER FOR ALL TRANSACTIONS:

What are the tax consequences of buying the new life insurance policy?
Is this a tax-free exchange? (See your tax advisor.)
Is there a benefit from favorable "grandfathered" treatment of the old life insurance policy under the Federal Internal Revenue Tax Code?
Will the existing insurer be willing to modify the old life insurance policy?
How does the quality and financial stability of the new company compare with your existing company?

IMPORTANT NOTICE: REPLACEMENT OF LIFE INSURANCE OR ANNUITIES

This document must be signed by the applicant and the insurance producer/agent, if there is one, and a copy left with the applicant.

You are contemplating the purchase of a life insurance policy or annuity contract. In some cases this purchase may involve discontinuing or changing an existing policy or contract. If so, a replacement is occurring. Financed purchases are also considered replacements.

A replacement occurs when a new life insurance policy or annuity contract is purchased and, in connection with the sale, you discontinue making premium payments on the existing life insurance policy or annuity contract, or an existing life insurance policy or annuity contract is surrendered, forfeited, assigned to the replacing insurer, or otherwise terminated or used in a financed purchase.

A financed purchase occurs when the purchase of a new life insurance policy involves the use of funds obtained by the withdrawal or surrender of or by borrowing some or all of the life insurance policy values, including accumulated dividends, of an existing life insurance policy, to pay all or part of any premium or payment due on the new life insurance policy. A financed purchase is a replacement.

You should carefully consider whether a replacement is in your best interests. You will pay acquisition costs and there may be surrender costs deducted from your life insurance policy or annuity contract. You may be able to make changes to your existing life insurance policy or annuity contract to meet your insurance needs at less cost. A financed purchase will reduce the value of your existing life insurance policy and may reduce the amount paid upon the death of the insured.

We want you to understand the effects of replacements and ask that you answer the following questions and consider the questions on the back of this form.

1. Are you considering discontinuing making premium payments, surrendering, forfeiting, assigning to the insurer, or otherwise terminating your existing life insurance policy or annuity contract? ☐ Yes ☐ No

2. Are you considering using funds from your existing policies or annuity contracts to pay premiums due on the new life insurance policy or annuity contract? ☐ Yes ☐ No

If you answered "Yes" to either of the above questions, list each existing life insurance policy or annuity contract you are contemplating replacing (include the name of the insurer, the insured or annuitant, and the life insurance policy or annuity contract number if available) and whether each life insurance policy or annuity contract will be replaced or used as a source of financing:

	INSURER NAME	ANNUITY CONTRACT OR LIFE INSURANCE POLICY #	INSURED OR ANNUITANT	REPLACED (R) or FINANCING (F)
1.				
2.				
3.				

Make sure you know the facts. Contact your existing company or its insurance producer/agent for information about the old life insurance policy or annuity contract. If you request one, an in-force illustration, life insurance policy summary or available disclosure documents must be sent to you by the existing insurer. Ask for and keep all sales material used by the insurance producer/agent in the sales presentation. Be sure that you make an informed decision.

The existing life insurance policy or annuity contract is being replaced because _____.

I certify that the responses herein are, to the best of my knowledge, accurate:

Applicant/Proposed Insured's Signature	Printed Name	Date
Owner's Signature (if other than Applicant/Proposed Insured)	Printed Name	Date
Joint Owner's Signature	Printed Name	Date
Insurance Producer's/Agent Signature	Printed Name	Date

I do not want this notice read aloud to me _____ (Owner/Applicants must initial only if they do not want the notice read aloud.)

A replacement may not be in your best interest, or your decision could be a good one. You should make a careful comparison of the costs and benefits of your existing life insurance policy or annuity contract and the proposed life insurance policy or annuity contract. One way to do this is to ask the company or insurance producer/agent that sold you your existing life insurance policy or annuity contract to provide you with information concerning your existing life insurance policy or annuity contract. This may include an illustration of how your existing life insurance policy or annuity contract is working now and how it would perform in the future based on certain assumptions. Illustrations should not, however, be used as a sole basis to compare policies or annuity contracts. You should discuss the following with your agent to determine whether replacement or financing your purchase makes sense:

PREMIUMS:

Are they affordable?
Could they change?
You're older - are premiums higher for the proposed new life insurance policy?
How long will you have to pay premiums on the new life insurance policy? On the old life insurance policy?

POLICY VALUES:

New policies usually take longer to build cash values and to pay dividends.
Acquisition costs for the old life insurance policy may have been paid; you will incur costs for the new one.
What surrender charges do the policies have?
What expense and sales charges will you pay on the new life insurance policy?
Does the new life insurance policy provide more insurance coverage?

INSURABILITY:

If your health has changed since you bought your old life insurance policy, the new one could cost you more, or you could be turned down.
You may need a medical exam for a new life insurance policy.
(Claims on most new policies for up to the first two years can be denied based on inaccurate statements. Suicide limitations may begin anew on the coverage.)

IF YOU ARE KEEPING THE OLD LIFE INSURANCE POLICY AS WELL AS THE NEW LIFE INSURANCE POLICY:

How are premiums for both policies being paid?
How will the premiums on your existing life insurance policy be affected?
Will a loan be deducted from death benefits?
What values from the old life insurance policy are being used to pay premiums?

IF YOU ARE SURRENDERING AN ANNUITY OR INTEREST SENSITIVE LIFE PRODUCT:

Will you pay surrender charges on your old annuity contract?
What are the interest rate guarantees for the new annuity contract?
Have you compared the annuity contract charges or other life insurance policy expenses?

OTHER ISSUES TO CONSIDER FOR ALL TRANSACTIONS:

What are the tax consequences of buying the new life insurance policy?
Is this a tax-free exchange? (See your tax advisor.)
Is there a benefit from favorable "grandfathered" treatment of the old life insurance policy under the Federal Internal Revenue Tax Code?
Will the existing insurer be willing to modify the old life insurance policy?
How does the quality and financial stability of the new company compare with your existing company?

Insurer/Existing Insurance Company Name: _____
(Please include Street Address, City, State, and Zip Code) : _____

Policy Number(s):_____

Estimated Cash Surrender Value: $_____ Phone Number(s): _____

For value received, I hereby assign and transfer to Protective Life Insurance Company (Protective Life) all right, title, and interest to the above listed policy(ies) in an exchange intended to qualify under Section 1035 of the Internal Revenue Code. However, this assignment and all other terms and agreements set forth below are conditioned upon Protective Life's underwriting and approving a new life insurance policy on the life of the Insured(s) named above. This conditional assignment will not become effective unless and until Protective Life approves a new life insurance policy.

I understand that if Protective Life approves a new life insurance policy on the life of the Insured(s) named above, then Protective Life will surrender the assigned policy(ies) and it/they will no longer be in force or effect as of the date of surrender. I further understand that, if Protective Life approves the new life insurance policy, Protective Life will collect whatever cash surrender values are available from the existing insurance company on the assigned policy(ies) and apply such amount received as premium on the new life insurance policy. I understand that the cash surrender value of the policy on the actual date of surrender is likely to be different from the cash surrender value of the policy today. This is especially true if the policy to be surrendered is a variable policy, since the cash surrender value of a variable policy fluctuates with the market. I agree that Protective Life assumes no responsibility if the full scheduled cash surrender values of the assigned policy(ies) are not received.

I certify that the above listed policy(ies) is/are currently in force and not subject to any prior assignments, any legal or equitable claims, or liens. I further certify that there is no proceeding in bankruptcy pending against me.

All other beneficiary designations under the above listed policy(ies) will remain in effect. **I FURTHER UNDERSTAND THAT THE POLICY(IES) TO BE ISSUED BY PROTECTIVE LIFE WILL HAVE THE SAME DESIGNATED INSURED(S) AND OWNER(S) AS THE ABOVE LISTED POLICY(IES).**

I certify that if the above listed policy(ies) is/are not attached to this conditional assignment that it/they has/have been lost or destroyed. I hereby waive all rights and benefits under such policy(ies) and agree to return it/them to you if it/they comes/come into my possession.

I understand and agree that I will be responsible for keeping the above listed policy(ies) in force by paying any premiums as they become due until such time as Protective Life notifies me in writing that I have been issued a new life insurance policy.

I understand that under Section 1035, reporting may be required for federal income tax purposes. The replaced company is required to report all exchanges of insurance contracts on Form 1099-R, including tax-free exchanges under Section 1035 in situations in which a policyholder has an outstanding policy loan at the time of exchange. If there is an outstanding policy loan at the time of the exchange, the transaction may not be characterized as tax-free. In fact, any gain will be taxed to the extent of the outstanding policy loan. Accordingly, I understand that it is advisable when filing my individual federal income tax return that I enclose a copy of the reporting form (Form 1099-R) with an explanation that the policy was exchanged pursuant to Section 1035 or otherwise and that Protective Life has no responsibility for the validity of this Assignment.

Please Check One: ☐ I have enclosed the original policy(ies) to be exchanged. ☐ I certify that the original policy(ies) has/have been lost or destroyed. To the best of my knowledge, the original policy(ies) is/are not in the possession or control of any other person.

REQUIRED CALIFORNIA DISCLOSURE – For Universal Life Policies with No-Lapse Guarantees

This policy is guaranteed to stay in force for a specified number of years as long as you meet the requirements of the Policy, including the Minimum Monthly Premium provision found in the policy contract. This provision is also known as a no-lapse guarantee, and a general description of the provision is included in the Narrative Summary section of the Basic Illustration.

While this policy provides a no-lapse guarantee, it may provide nonforfeiture benefits, such as cash surrender values, which are less than those that would be provided if the guarantee were issued as a separate policy, such as a term policy. If a separate term policy has higher nonforfeiture benefits, the premiums for the separate policy might be higher than the premiums for the no-lapse guarantee provided in this policy. Therefore, when considering the purchase of this policy, you should compare the value of higher nonforfeiture benefits, such as cash surrender values, versus the premiums required to keep your insurance coverage in force.

REQUIRED SOUTH CAROLINA DISCLOSURE – For Universal Life Policies with No-Lapse Guarantees

If there is no policy debt or partial surrenders, this policy is guaranteed to stay in force during the no lapse period as long as you have paid the required minimum premiums. This guarantee could be provided by a separate policy (such as a term policy). However, the nonforfeiture benefits (such as cash surrender value) in this policy may be significantly less valuable than those provided by the separate policy. So, if you fail to pay a premium within a specified period of time from its due date or otherwise cause this policy to terminate early, the benefits paid to you upon termination could be much less than would customarily be paid if provided by the separate policy.

When thinking about purchasing this policy, you should consider the tradeoff you may be making between having significantly smaller nonforfeiture benefits (such as a cash surrender value) available to you upon surrender of the policy versus the reduction in premium, if any, you may receive for not having these benefits.
